Forecast for Wednesday 17 Feb 2021

Weather: A band of rain, with snow above roughly 750m, will cross early morning, briefly heavy with blizzards on the tops. This clearing through quickly so from mid morning becoming bright and mainly dry but with a few passing showers, mainly west of the A9, and of snow to 5-600m. Cloud thickening in the evening with more persistent rain reaching the south.

Chance of cloud free mountain/hill tops above 800m: 30% in morning rising 70% in afternoon, falling to 10% during the evening.

Visibility: Occasionally poor at first in rain, snow and very poor in blizzard conditions. By mid morning, mostly good away from cloud and showers. Briefly poor in showers and local reductions at height where wind lifts lying snow. Cloud extensive above 750m overnight and at first in morning, becoming more patchy and generally lifting to 900m by the afternoon. Low cloud becoming more extensive in the evening with more persistent rain reaching the south.

Met Office Aberdeen Meteorologist's View
Note the very low feels like temperatures.

Forecast for Thursday 18 Feb 2021
Weather: Cloudy with more persistent rain, with snow above 800m, spreading north in the early hours the snow becoming confined to the very highest tops for a time. During the day colder air slowly filtering back in from the west so reverting to snow down to 6 or 700m through becoming mostly light and intermittent or showery with a few breaks in the cloud Angus and Aberdeenshire Hills.

Maximum wind: Southerly 45 gusts 65mph easing 25 gusts 35mph and veering westerly.

Chance of cloud free mountain/hill tops above 800m: 10%, rising 40% in afternoon reflecting the greater chance of breaks in the east.

Visibility: Poor overnight and morning in rain and snow, with extensive cloud 500-750m then improving to mainly good but occasionally moderate in showers. Cloud bases lifting 750-900m and breaking in shelter especially over Aberdeenshire and Angus.

Temperature: **Glens:** Plus 4 Celsius rising to Plus 7 for a time.
At 800m: Plus 1 rising to Plus 5 for a time, falling to zero in the afternoon.
Freezing level: 900m rising to 1300m late in night into the morning then edging down to 800m in the afternoon.
